LOVE SEEDS

These are little Love Seeds
It's amazing how they grow!
Plant one beneath the soil
Before off-to-bed you go.

They don't need food or water,
And just one seed will work best.
Just blow a kiss and let it sit
Then you can share the rest!

When you wake up at morning,
You're in for a special treat-
These magic little Love seeds
Will grow into something neat!
